Introduction

The Odisha State Cooperative Milk Producers' Federation Ltd.(OMFED) was established during Operation Flood-II (1980 to 1985) to set up dairy cooperatives in Odisha state based on Anand Pattern. Accordingly, Village level dairy cooperative societies (DCS) are organized at grass root level to procure milk from milk producers and arrange payment based on Fat and SNF content. The procured milk transported to Chilling Centre/Bulk milk coolers owned by District cooperative OMFEDs. After chilling, the milk is supplied to nearest dairy owned by OMFED for processing and marketing. There are 12 Milk OMFEDs federated to Odisha State cooperative milk producers' Federation Ltd. (OMFED). It is an apex level dairy cooperative society registered under cooperative society Act-1962. Milk and Milk products are sold under the brand name of "OMFED" by cooperatives.

At present OMFED is procuring on an average 6.0 lakh liters of milk per day from 3760 Dairy Cooperative Societies having 2,83,000 producer members. The average milk marketing including milk products is around 5.0 lakh liters per day, as against the existing processing capacity of 5.5 lakh liter per day. In the recent days, OMFED has taken steps to double its milk procurement in next 5 years. Various Govt. Schemes like RKVY, NDP-1, NPCBB&DD, CMP & IDDP Schemes are under implementation to achieve the projected target of milk procurement to the tune of 10 lakh Ltrs. Per Day. Further, State Govt. is also encouraging the Dairy Farmers by providing health care and breeding supports along with short & long term credit with interest subvention to enhance the milk production. As milk is highly perishable, additional chilling infrastructure needs to be created.
