**SCOPE OF WORK for Obtaining ground water clearance from
Central Ground Water Board**

1. Collection of location details like topographical survey of the area.
2. The detailed hydro geological investigation depicting the present ground water condition in and around the area along with the chemical quality report.
3. Detailed site specific hydro geological investigation keeping in view of the present water requirement/utilization for the plant from ground water source and further demand for future expansion.
4. Hydro-geological report depicting the ground water resources availability within a radius of 10 KM of plant site taking into consideration details of ground water withdrawals made by different major and medium/small scale industries.
5. Collection of hydro geological data, site map, depth of water level, water table contour and aquifer parameters based on pumping test data and chemical analysis.
6. Submission of resistivity survey report of water in different bore well.
7. Preparation & submission of final report, giving presentation at state and Central Ground water board and liaison with authority to obtain NOC.
8. Scrutiny and compilation of documents and preparation of application documents as per CGWA guidelines for obtaining NOC.
9. Compliance of the scientific queries related to the project not requiring any additional study beyond the aforementioned scope of work put by CGWB, Bhubaneswar.
10. Follow-up and facilitation of application at CGWA till obtaining NOC/Exemption clearance.
11. Any point specifically not mentioned but essential for getting the approval shall be included in the scope of work.
